Since three lines are parallel, you can determine most of the
angles using "Parallel lines cut by a transversal" Since the
two sides of that triangle are equal, the angles opposite the
sides are equal

that it contains several other quadrilaterals and triangles. Record the given information on the diagram. Then use this information and your understanding of quadrilaterals and triangles to find the measures of the missing angles. Write the measures in their proper place on the diagram, being sure that any measures you record on the diagram are correct.
