by the application of scientific method to the problem concerned.

~~Principles of Scientific Management : 6 Principles~~

Scientific management has at its heart four core principles that also apply to organizations today. They include the following: Look at each job or task scientifically to determine the “ one best way ” to perform the job. This is a change from the previous “ rule of thumb ” method where workers devised their own ways to do the job.

~~Scientific Management | Principles of Management~~

The aim of scientific management is to see maximum prosperity for employer and employees. It is important only when there is

opportunity for each worker to attain his highest efficiency. Maximum output & optimum utilization of resources will bring higher profits for the employer & better wages for the workers.

~~Principles of Scientific Management~~

The basic principles of Scientific Management can be summarized as follows: Rule-of-thumb working methods should be replaced with methods based on a scientific study of the tasks. Individual workers should be selected, trained, and developed to complete specific tasks, rather than leave them to their own skills and passively training themselves.
